Sanctuary Camera Upgrade Rev1

<u>Product</u>	<u>Description</u>	<u>Qty</u>		
Scope of Work:				
<i>The proposed solution is to provide a 1080P quality video device for Live Streaming and Recording purposes. The on-board SD card of the camera will allow for local recording while the NDI or HDMI connections will allow for integration into the live streaming and recording solution. The camera is a pan-tilt-zoom style camera with 30X zoom capability. In order to best control the capabilities of the camera the RP60 controller has been included but is not required as the Panasonic App running on an IOS device can work as well. A 12 port POE switch with routing capabilities has been included for future expansion. This project requires at a minimum, 3 ports with 2 needing POE+ capability. The intent is to install the camera on balcony and replace the existing camera in the Sanctuary. A minimum of 2 presets will be programmed into the camera for wide and zoomed video capture.</i>
